Introduction

As part of the comprehensive improvement plan for the 2008–2009 school year, the Prince George’s County Public Schools (PGCPS) Department of Research and Evaluation (DRE) conducted a survey to determine how students, parents, and teachers feel about their schools. By conducting the survey, the DRE was able to collect stakeholders’ opinions on factors such as school leadership, level of safety in the schools, and amount of parental involvement, which, when analyzed, reveal what the stakeholders think about their schools’ overall climate and effectiveness.

With this information, district and school will be able to identify strengths that can be built upon to support future improvements. They can also determine what changes are needed to improve school climate and effectiveness and, thus, advance the academic achievement of students.

How to Interpret the Data

A step-by step guide to interpret the data for each table and figure is provided below:

- **Table 1** provides a summary of the number of students, parents, and teachers that participated in the SY 2008/2009 School Climate Survey. Each stakeholder group — students, parents and teachers/paraprofessionals—is listed in the 1st column. The 2nd column indicates the different subsets of data—your individual school, and all elementary schools in the district. This allows you to see how your school compares to the average elementary school. The 3rd column (*Sample*) indicates the total number of individuals who were invited to participate in the survey. The 4th column (*Number of Respondents*) indicates the number of participants that responded to the survey. The 5th column (*Response Rate*) is expressed as the percentage of the participants that responded to the survey (Number of Respondents divided by Sample and multiplied by 100).
- **Table 2** provides the percentage of respondents who expressed positive feelings about each of the characteristics of effective schools. The 1st column lists the key characteristics of effective schools measured by this survey (i.e., Effective Instructional Leadership, Clear and Focused Mission, etc.) and a composite measure of all of the key characteristics. The remaining columns represent each stakeholder group, and allow you to compare your school’s results with the results from all elementary schools in PGCPS for SY2009.
- **Table 3** is similar to Table 2, except that it shows stakeholders’ perceptions of your school from SY2007 to SY2009 so that you can see where you made progress or where problems have developed over the past two years.
- **Figures 1 - 13** are graphic illustrations of the data presented in Tables 2 and 3. Figure 1 compares stakeholders’ perceptions of your school with the perceptions of stakeholders

about all elementary schools in PGCPs for SY2009. Figure 2 show the stakeholders’ perception about your school from SY2007 and SY2009. Figures 3 through 13 show the stakeholders’ perceptions of individual characteristics of effective schools. The charts on the left side of the page provide a visual comparison of your school’s results with those of all elementary schools in the district during SY2009. The charts on the right side of the page illustrate a comparison between your school’s results from SY2007 and this year’s results.

- **Tables 4-6** are the item response tables for each of the stakeholder groups for your school. Table 4 shows the student results, Table 5 displays the parent results and Table 6 represents teacher results. The 1st column lists the items to which participants were asked to respond. The second column (*N*) represents the number of people who responded to that item. Columns 3 through 7 represent the percent of participants who responded in the way indicated at the top of the column.
