Findings from the 2017 School Climate Survey– Results for SUITLAND ES

I. INTRODUCTION

In the spring of 2017 the Prince George’s County Public Schools (PGCPS) Department of Testing, Research, and Evaluation (DTRE) surveyed students and parents to determine how they feel about different aspects of their schools. The survey measures 12 key characteristics found to be related to school climate (see Table 1).

Table 1–Description of the Subscales of the PGCPS 2017 School Climate Survey Instrument

Name of Subscale	Primary Focus (Underlying Theme) of Subscale
Effective Instructional Leadership	Principal communicates his/her vision/goals to all stakeholders and he/she is knowledgeable about and supports/promotes best practices to advance student learning
Sense of Shared Mission	All stakeholders believe in the school’s mission, have a sense of shared ownership for student success, and participate in activities to support the school’s mission
Effective Teaching	Teachers in the school are experts in the subjects they teach and utilize effective instructional strategies/approaches to ensure students learn the content being taught.
Challenging and Relevant Curriculum	The curriculum offered in the school is sufficiently challenging, varied to meet the needs/interests of all students, and relevant to the needs of the 21st century.
High Expectations for All Students	All students are expected to achieve at high levels regardless of gender, race, ethnicity, and/or socio-economic status.
Positive and Nurturing Environment	Principal, teachers, and students in the school are respectful and supportive of each other and students’ successes are rewarded and publicly recognized.
Effective Plant Operations	The school buildings and grounds are well-maintained, equipment is up-to-date and functional, and adequate resources are available to support teaching and learning.
Safety and Discipline	All stakeholders feel safe in the school and school’s disciplinary procedures are enforced fairly.
Meaningful Use of Data	Student achievement and other type of data are readily available and teachers routinely use them to inform what and how they teach.
Parental Involvement	Parents of students in the school are engaged in their children’s education and actively support the learning goals for their children.
Teacher Involvement in Decision Making	Teachers in the school are involved in and can influence decisions regarding school operations.
Relevant Professional Development	Professional development opportunities that are aligned with teachers’ needs are available, and teachers’ participation are encouraged.

II. HOW TO INTERPRET THE DATA

A step-by-step guide to interpret the data for each table and figure is provided below:

- **Table 2** provides a summary of the number of students and parents who participated in the 2017 *School Climate Survey*. Each stakeholder group—students and parents—is listed in the first column, which also indicates the different subsets of data—your individual school, and all elementary schools in the district. This allows you to see how your school compares to the average elementary school. The second column (*Sample*) indicates the total number of individuals who were invited to participate in the survey. The third column (*Number of Respondents*) indicates the number of participants that responded to the survey. The fourth column (*Response Rate*) is expressed as the percentage of the participants who responded to the survey (Number of Respondents divided by Sample and multiplied by 100).
- **Table 3** provides the percentage of respondents who expressed positive feelings about each of the characteristics of effective schools. The first column lists the key characteristics of effective schools measured by this survey (i.e., Effective Instructional Leadership, Sense of Shared Mission, Effective Teaching, etc.) and a composite measure of all of the key characteristics. The remaining columns represent each stakeholder group, and allow you to compare your school’s results with the results from all elementary schools in PGCPs for SY2017.
- **Figures 1 – 4** are graphic illustrations of the data presented in Table 3. Each figure represents two columns of data in Table 3. For example, Figure 1 represents columns two and three of the data in Table 3, the percentage of all respondents expressing positive perceptions of the characteristics of effective schools. Figure 2 represents the fourth and fifth columns of data—student perceptions of each characteristic. Figure 3 represents the perceptions of parents, and Figure 4 the perceptions of teachers.
- **Tables 4 – 6** provide the percentage of respondents who expressed positive feelings (i.e., strongly agree/agree) about each item in the survey. Table 4 shows the student results, Table 5 displays the parent results, and Table 6 the teacher results. The first column lists the items to which participants were asked to respond. The second column (*Number Responding*) indicates the number of individuals who responded to each item. The third column represents the percent of participants who expressed positive feelings about each item.
- **Tables 7 – 9** are the item response tables for each of the stakeholder groups for your school. Table 7 shows the student results, Table 8 displays the parent results, and Table 9 presents the responses from teachers. The first column lists the items to which participants were asked to respond. The columns to the right show the number of respondents for each item and the distribution of their responses.
